Profile

Final-year Computer Science student with experience in Python, SQL, C#, data analytics, machine learning, and software development. Developed a Credit Risk Prediction System using machine learning and Power BI, alongside healthcare and algorithm-focused software projects. Combining technical skills with several years of leadership experience in fast-paced environments.

Education

Teesside University, Computer Science 2023 - 2026

Waltham Forest Sixth Form College, BTEC ICT Extended Diploma 2013 - 2016
Grade: DDD* (Triple Distinction Star)

Tauragės "Šaltinio" Progimnazija, (Lithuanian General State Education) 2003 - 2010
8/10 Average

Professional Projects

Final year University Project "Data-Driven Credit Risk Modeling for Smarter Lending Decisions" **Oct 2025 – Apr 2026**

Skills used: Python for Machine Learning, Power BI for visual interface
My personal project for final year of university. By the rise of AI in different industries, decision was made to polish my skills in Machine Learning and test and report my finding of different AI models for industry education. To start project explores Logistic Regression, Random Forest and XGBoost for learning about credit scores and allowing bank industry to have more insight on which model is the least bias and fit the purpose the most.

Enterprise Project "QuickCare" Teesside University **Nov 2024 – Jun 2025**

Language and skills used: C#, HTML, SQL, Python, Scrum framework
Project was created for participation in ExpoTees. Created a healthcare app for industry presentation. App was created using C# back end with HTML front end. Database for project was used in split with Azure SQL and local database. AI was implemented by using custom chat bot to identify user condition and give accurate diagnosis for customer to receive appropriate help. Scrum framework was used to tie the team together. Other project artefacts included: Wireframe, sprint board, report, presentation, requirement list. By the end of the demo the user was able to create an account and enter their details with medical conditions and able to receive accurate guidance.
This app's purpose was to streamline health care assistance for customers and decrease waiting time to get prompted help for appointments in GP, pharmacy or hospital depending on severity of their issue.
Received second place in the Waterstons for the project.

Maze solving problem **Jan 2025 – Jun 2025**

Language used: Python
Project purpose was to learn the difference between different sorting algorithms and weight them between each other.
Implementation took place in premade 50 by 50 mazes with two different maze layouts, perfect and looping

maze to test DFS, BFS, A* and GBFS algorithm functionality.
After testing the result was that A* has the best performance in path finding problems.
The value of this project is to identify suitable algorithms for different tasks.

University Project for “NHS Family Voice app design”

Jan 2024 – Jun 2024

Skills used: Excel, Word, PowerPoint

Created a draft for healthcare end-of-life support application for family.

During this project, created following project artifacts: UML class designs, sequence and use case Diagrams alongside wireframes, requirements list and legal documents such as Diversity, Legal, Professional standard, Social and Ethnical Compliance documents and Sustainability Statement.

The outcome of this project was approved and gave a base line knowledge to Enterprise Project “QuickCare”

Employment History

Pret A Manger – Front of House Team Leader

Sep 2022 – Sep 2023

As a Team leader in station shop my duties included:

- Providing excellent customer service, adhering to standards and supporting the team
- Stock and cash control

Costa – Barista Maestro

Sep 2021 – Sep 2022

As a Barista Maestro I managed a drive through the shop, my duties included:

- Stock and cash control, while striving to motivate and support the team to adhere to health and safety standards.

Young & Co’s Brewery - Assistant Manager

Jul 2021 – Sep 2021

This experience provided me with refreshing knowledge of managerial roles in the central London theater pub, my duties involved:

- Managing a team, scheduling, stock, cash control, legal documents and providing support to the business.

Monolith (UK) LTD – Warehouse Staff
